About

Samuel Gareau-Lajoie is a family physician in Quebec and a speaker on AI in healthcare. He has completed AI in Health training at Queen's University and holds Google Cloud and Mila certifications, with 10 years of clinical practice. He works at the intersection of clinical practice, innovation, and responsibility, helping clinical teams save time without sacrificing judgment through tools like AI scribes, evidence research tools, digital patient pathways, and governance. His work is grounded in literature and practical experience.

Why choose Dr. Samuel?

Medical training

Family doctor with 10 years of experience in Quebec, possessing a deep understanding of the field's realities.

Research

Co-author of published and ongoing studies on medical AI, contributing to the scientific literature.

Technological expertise
